About

Scepter is a flared serif with a distinct essence. Directly inspired by incised typefaces of the past century, it crystallizes the charm of its engraved predecessors and evolves beyond with a refined sensibility. Sharp flares and precise cuts form the character, while the carefully balanced proportions establish rhythm and harmony.

The Cuckoo’s Egg: Tracking a Spy Through the Maze of Computer Espionage

30 pt

Author Clifford Stoll, an astronomer by training, managed computers at Lawrence Berkeley National Laboratory (LBNL) in California. One day in 1986 his supervisor asked him to resolve an accounting error of 75 cents in the computer usage accounts. Stoll traced the error to an unauthorized user who had apparently used nine seconds of computer time and not paid for it. Stoll eventually realized that the unauthorized user was a hacker who had acquired superuser access to the LBNL system by exploiting a vulnerability in the movemail function of the original GNU Emacs. Early on, and over the course of a long weekend, Stoll rounded up fifty terminals, as well as teleprinters, mostly by “borrowing” them from the desks of co-workers away for the weekend. He physically attached them to the fifty incoming phone lines at LBNL. When the hacker dialed in that weekend, Stoll located the phone line used, which was coming from the Tymnet routing service. With the help of Tymnet, he eventually tracked the intrusion to a call center at MITRE, a defense contractor in McLean, Virginia.
